

The Synergy OR

The Synergy^{UHD4**} system revolutionizes endoscopy image management and OR integration as the first autoclavable 4K camera system with comprehensive OR and EMR integration capacity. The Synergy^{UHD4} system is the future of minimally invasive surgical imaging built for every OR staff member.

Enhance your operating room experience

- Seamless connection to PACS, EMR, and VNA for secure automatic image transfer and OR schedule
- Centralized, customizable preset by surgeon and specialty/procedure ensures easy setup and consistent user experience
- Enhanced patient experience and engagement with the Arthrex SurgeonVault® app
- Remote system monitoring and service to maximize uptime

Built-in cost savings advantages:

- 3-in-1 console drives down acquisition cost
- Save time and money with autoclaving versus chemical sterilization methods
- 7-year warranty on LED light engine
- 7-year warranty against autoclave failure
- Securely transfer still images and video to PACS,
 EMR, and Synergy Surgeon App[™] software to
 eliminate costly prints
